

GROW MORE WITH LESS

What's a Nano-Based Biostimulant?

Biostimulants are used in addition to NPK-based fertilizers to provide increased yields, improved plant vigor, produce quality and tolerance of abiotic stresses. Full On uses nanoscale technology (particles less than 50 nanometers in size). Our formulation fills in the missing links and provides all necessary building blocks of plant life, and the energy for the necessary conversions and exchanges to occur.

How does it work?

Think of it like a super effective transporter moving nutrients into the plant. This happens very efficiently because of the minuscule nano size (quantum angstrom) allows it to enter into plant cells with ease. As a result, increased photosynthesis occurs that improves cellulose, sugars/brix, starches, waxes, carbohydrates, oils and proteins; the building blocks of plant growth and health.

New levels of nutrient uptake utilization

achieved through nanoscale technology eliminate the need for ~50% of NPK's. Providing cost reductions and helping to reduce environment impacts in the environment.

Higher Brix, Increased Nutrient Density

gives products grown with Full On a distinct advantage in every market.

- ◆ Proprietary Nano-Based Biostimulant sets new levels of nutrient uptake and utilization.
- ◆ Boosts plants ability to efficiently convert nutrients into new cell growth.
- ◆ Improved Drought and Pest Resistance.
- ◆ Increased Yields. Flush cycles reduced from weeks to days.
- ◆ Higher Brix Productions and Nutrient Density.
- ◆ Effective in all growing environments and with all nutrient regimens.

Maximum results will be realized using Full On as a root drench once or twice a week and as a foliar spray once a week.

Feeding Suggestions

| Plant Phase | Root Drench | | Foliar Application |
|---|-------------|---------------|--------------------|
| General Indoor/Outdoor Gardening | ML/Gallon | Dilution Rate | ML/Gallon |
| Vegetative | 4 | 1000:1 | 4 |
| Bloom | 2 | 2000:1 | 4 |

| Plant Phase | Root Drench | | Foliar Application |
|--|-------------|------------------|--------------------|
| Container & Hydroponic Gardening | ML/Gallon | Dilution Rate | ML/Gallon |
| Germination, Seedlings, Cuttings | 2 | 2000:1 | |
| Early Vegetative | 4 - 6 | 650:1 to 1000:1 | 4 |
| Late Vegetative | 4 - 5 | 750:1 to 1000:1 | 4 |
| Transition | 4 | 1000:1 | 4 |
| Early Bloom | 2 | 2000:1 | 4 |
| Mid Bloom | 2 - 4 | 2000:1 to 1000:1 | 4 |
| Late Bloom | 2 - 4 | 2000:1 to 1000:1 | 4 |
| Outdoor Gardens & Fast Blooming Annuals | | | |
| Vegetative | 4 - 8 | 500:1 to 1000:1 | 4 - 8 |
| Bloom | 2 - 8 | 500:1 to 2000:1 | 4 |
| Late Bloom | 2 - 8 | 500:1 to 2000:1 | 4 |
| Additional/General Use | | | |
| General Use Including Cutting Production | 4 | 1000:1 | 4 |

As there are new NPK base nutrients being introduced that we have not used on conjunction with Full On, we recommend reducing NPK's by 50% on the first root feeding with Full On. Keep out of reach of children and pets. Store in a cool place.
